

## IT'S LESS WORK ON YOUR END THAN YOU THINK.

We know you have competing priorities and projects. That's why our team created a five-phase approach to make implementation simple and efficient for you and your organization.

### 1 | GATHER 1 WEEK

We provide your implementation plan. You grab all the data that we use to set up onePAY.

### 2 | BUILD 45 MIN PER WEEK | 2-4 WEEKS

Using your data and business rules, we build out the app. We'll touch base a few times to talk imports, templates and workflows.

### 3 | TEST & TRAIN UP TO 3 HOURS PER PROCESSOR | 1 WEEK

We train your team for success. Meanwhile, we test your rules configurations and data mappings.

### 4 | CERTIFY & UPDATE UP TO 3 HOURS | 1 WEEK

We'll confirm rules, workflows and data-capture rate. We ensure your team is prepared and ready to go live.

### 5 | GO LIVE YOU'RE NOW LIVE ON THE PLATFORM!

### GO LIVE IN 40 DAYS.

“The team has been extremely helpful through the process and readily available. The onePAY team made sure the integration from onePAY to our software worked. It was done quickly and correctly.”  
- Joey Anderson, Wen GAP, LLC

## AN IMPLEMENTATION YOU CAN HANDLE BECAUSE WE HANDLE THE BULK OF IT FOR YOU.

Our simple implementation method comes from years of successful onboarding experience. More importantly, we understand you have competing priorities. That's why we have designed our implementation to require a minimal time commitment from you and your organization.

Gain efficiencies, take control and improve your bottom line with onePAY by OneDataSource. Contact [sales@OneDataSource.com](mailto:sales@OneDataSource.com) to get started.
